**DMCONNECT PRO POWERED BY NUANCE**

POWERFUL PROCESS AUTOMATION.

AUTOMATE DOCUMENT PROCESSING WITH A SINGLE SCAN.

DMCONNECT PRO'S INTELLIGENT FORMS RECOGNITION EMPOWERS DOCUMENT BUSINESS PROCESSES.

Automating business processes is a key initiative for today's enterprises. Not only does automation reduce multiple tedious tasks, it also increases accuracy and productivity, and helps boost profitability. Enterprise-level organizations process vast amounts of data each day, and it is here that accuracy and streamlining the processes through automation is most critical. Kyocera DMConnect Pro is a sophisticated capture and distribution business application with forms recognition that intelligently powers document capture, processing and routing, helping enterprises stay efficient while strengthening their bottom line.

DMConnect Pro enables organizations to scan documents using 2D Barcode capabilities eliminating human error associated with the manual entry of data thus increasing productivity. The OCR (Optical Character Recognition) technology and Forms Recognition feature interpret the type of document that was scanned, (invoice, Excel spreadsheet, etc.) and extract only the essential information from the scanned document type. Captured information can be easily dispersed throughout the enterprise, while providing secure access to vital information to enhance workflow productivity. DMConnect Pro can integrate with active directory for added security at the MFP with the addition of Kyocera's Card Authentication Kit. Once their ID is swiped through the card reader the organization's identification credentials can be used to manage access. In addition, the Excel data lookup feature enables users to search information in a selected database easily accessing information such as a customer's email address without having to install MS Office. This allows for quick and easy document routing and eliminates the need to manually scroll through an entire database.

As an example, logistics companies are among large enterprises that utilize 2D Barcodes (PDF417 Two Dimensional Symbol 2D Barcode). They employ high-density symbology, enabling the company to encode large amounts of data into the 2D Barcode, which will travel with the package. The barcodes are printed on packing slips at the MFP, which automates delivering and tracking services.
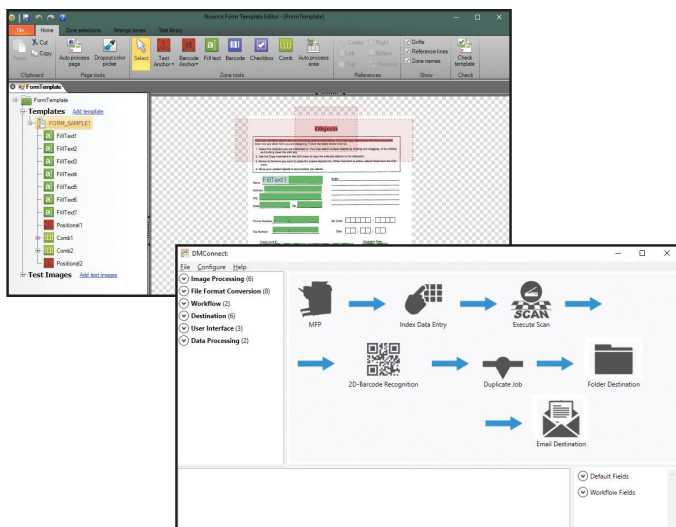

DMCONNECT PRO KEY FEATURES:

› Forms recognition allows data to be extracted automatically without manual indexing
› 2D barcode support ability to read data from QR and PDF417 codes enhances data extraction capabilities

› Data validation on the MFP panel allows users to validate OCR data after scanning to eliminate errors
› MS Excel-based data lookup feature allows users to easily search for documents based on criteria in captured fields

DMCONNECT PRO

HyPAS®

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. It enhances your MFP's core capabilities, integrates seamlessly with all widely accepted software applications, and enhances your specific document imaging processes. With HyPAS, you'll share more information, optimize your resources, and streamline your document workflows.

DMConnect Pro's flexible architecture powers an organization's workflow through seamless functionality that satisfies organizational needs.

SYSTEM REQUIREMENTS

Operating Systems

Windows Server 2016, Windows Server 2012 R2,
Windows Server 2008 R2 SP1
Windows Server 2010, Windows 8.1, Windows 7 SP1

Minimum Hardware Requirements

2 GHz or faster processor, 1 GB of RAM, 5 GB of available hard disk space

Other Software Prerequisites

Microsoft .NET version 4.6 is required

Integration with the following versions of Microsoft Excel is supported:
Excel 2013, Excel 2010, Excel 2007

Integration with following versions of Microsoft SharePoint is supported:
SharePoint 2016, SharePoint Online (Microsoft Office 365), SharePoint Server 2013 Standard and Enterprise Edition, SharePoint Foundation 2013, SharePoint Server 2010 Standard and Enterprise Edition, SharePoint Foundation 2010

DMCONNECT PRO BENEFITS

DMConnect Pro provides seamless data capture, indexing and routing of documents using the MFP. Enhanced features make organizing, retrieving and utilizing data and documents seamless and error free, with key capabilities including:

> Seamlessly scan 2D Barcodes, QR Codes and PDF-417 type barcodes
> Automatically extract data, create folders, structure documents, and move files with automatic routing
> Reduce manual data entry, saving time and effort
> Templates for document types are automatically decided using a forms recognition engine
> Validate the scanned data to correct or add additional information, eliminating errors before starting workflow, and add full pages to originally scanned documents
> DMConnect Studio allows user-friendly drag and drop capabilities, and to print a document directly from your workflow
> Seamlessly index documents and route them to your content management system
> Excel-based data lookup utility to easily search by name, invoice, year or other applicable fields, without having to install Microsoft office

APPLICATION SCENARIO

Within the legal industry, there are many documents that firms are required by law to keep on file for a minimum of seven years. Additionally, most firms have an extremely ambiguous and tedious process for creating and retrieving important data and client documents. They often use storage companies to transport their hardcopy documents and store them off site for safety and security reasons.

All of these scenarios present cumbersome, costly and time-consuming challenges. They can also hamper access to critical information. DMConnect Pro offers a smart alternative answer, providing law firms with the ability to scan and store their own documents in easily recognizable digital files and formats, which can then be shared securely throughout the enterprise. It simplifies the workflow process, provides seamless and immediate data retrieval, and minimizes administrative overhead.
