

# KYOCERA OmniWorx™

powered by Hyland

An enterprise-level platform designed for growing companies. Take control of the documents that drive your business.

Your business is growing, but is your document management system keeping up? KYOCERA OmniWorx is designed specifically for small to midsize companies – providing customized enterprise-level integration capabilities without long ramp-up times, security headaches, and conversion chaos.

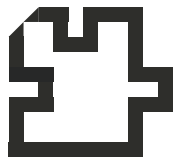

### Hyland® Cloud

Rapid deployment in a secure space, no on-site hardware to maintain.

### Workflow Customization

Adaptable for virtually any document environment utilizing OnBase® Studio.

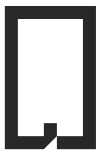

### Three Pre-Configured Workflows

Turnkey solutions for Accounts Payable, Contract Management, HR Onboarding.

### Document Encryption

SOC audited, ISO 27001 certified, SCCA Star Registrant.

### Accessible from Anywhere

Users can access and interact with content from any connected device.

### DMConnect Integration

Kyocera app enables paper documents, even emails, to be added to digital workflow.

## Simple, intuitive document management built to grow along with your business

- Scalable – your business can't outgrow it
- Industry-leading security credentials
- 24/7/365 - anytime/anywhere access
- Minimal end-user training requirements

# Three Pre-Configured Workflows

KYOCERA OmniWorx offers ready-to-run ECM solutions for three of the most document-intensive challenges faced by small and mid-sized organizations. These are turnkey solutions that are also fully customizable.

## 1 Accounts Payable

Track, manage, and approve invoices; quickly retrieve supporting documentation.

## 2 Contract Management

Store contracts in one central repository; securely send to external partners.

## 3 HR Onboarding

Track progress of new employees as they complete onboarding process.
