

# PROTECT YOUR MISSION-CRITICAL DOCUMENTS.

## PRESERVDOX<sup>™</sup> SAFEGUARDS DATA WHEN NETWORKS GO DOWN.

PRESERVDOX<sup>™</sup> IS THE IDEAL SECURITY MEASURE FOR ANY ORGANIZATION THAT NEEDS ONGOING ACCESS TO CRITICAL FILES.

Schools. Hospitals. Law firms. Every organization has documents it can't afford to lose. That's why KYOCERA created PreservDox<sup>™</sup>. This powerful, proprietary business application provides you with a level of protection that goes above and beyond conventional backup routines. When configured on your network, it automatically saves mission-critical documents on your MFP's hard drive—so you'll have immediate access to the data even if your network goes down. Plus, PreservDox<sup>™</sup> respects the privacy of your data by blocking unauthorized access to the files with personalized PIN codes.

Business continuity solutions do not address the period of time an organization is most vulnerable: the critical gap between a server going down and network operations being restored.

KYOCERA's PreservDox<sup>™</sup> fills that gap. It allows PDFs to be saved to a synchronized "watch" folder on a PC or server, and automatically stores the files on an MFP's hard drive — thus allowing for immediate access, whether or not the network is operating. Users can access the designated folder on any HyPAS-enabled MFP on the network using an individual four-digit PIN code. In addition, PreservDox<sup>™</sup> can provide your administrators with status information on when the last update was sent, as well as cloning capability for them to disburse application settings across multiple devices.

## USING PRESERDOX™ IS SIMPLE AND INTUITIVE:

- > Protect the document by copying it to a designated watch folder.
- In the event of network failure, retrieve the document by launching PreservDox<sup>™</sup> and entering the appropriate four-digit PIN at the MFP's control panel.
- > Select the file and print.

## KYOCERA PRESERVDOX™

## HyPAS<sup>®</sup>

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

The simplicity and stability of PreservDox<sup>™</sup> makes it an ideal solution for any organization looking for an extra level of protection when safeguarding its mission-critical documents.

## PRESERVDOX<sup>™</sup> BENEFITS

- > Protects your organization against data loss
- > Stores mission-critical data as a PDF after delivery
- > Ensures the privacy of files with a four-digit PIN code
- Provides access to vital information while networks are down or being restored
- Allows users to retrieve documents from any configured HyPAS-enabled MFP in the network—right from the MFP control panel
- Lets administrators assign documents for safeguarding quickly and easily
- Increases employee productivity by providing immediate access to critical information

## SYSTEM REQUIREMENTS
